

www.poeppelmann.com/en/gpn240

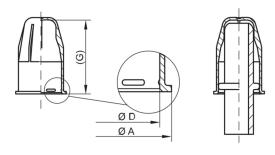

Application

The GPN 240 protective caps are suitable for protecting the connection area of SAE quickconnect plugs. The protective cap is designed not to touch the sealing surface of the SAE connector and is suitable for pressure testing within certain limits.

All information about 100% PCR and the recycling blend can be found in "Sustainability at Pöppelmann" (see chapter 2) or at www.poeppelmann.com/en/kapsto/Responsibility.html

Information on materials, colours, designs and use of our products can be found on the website and in chapter 3' Materials and application'.

The articles in the 100% PCR column consist of 98% PCR-PE and 2% colour based on a PIR carrier. The plastic used consists of 100% PCR.

The articles in the recycled mixture column consist of a blend of PCR and virgin material. Colour deviations and black dots cannot be completely avoided during production and are permissible for these items. We recommend carrying out functional tests before series production.

Your added values:

More resource-saving.

This standard series is available from PCR, saves CO2e emissions and conserves resources.

For protecting the mating surfaces of SAE quick-connect depending on the application. plugs.

Suitable for pressure testing

VDA Band 19 and ISO 16232 in our cleanroom on request.

Production in accordance with The sealing surface of the SAE connector remains untouched.
