Grease Nipple Caps

GPN 985 Type B

PÖPPELMANN® KAPSTO®

Application

The GPN 985 type B grease nipple caps are suitable for protecting tapered grease nipples in accordance with DIN EN 71412 and feature a captive tab design. The outer wall is knurled for a good grip for easier assembly and disassembly.

Dimensions in mm.

Information on materials, colours, designs and use of our products can be found on the website and in chapter 4 'Materials and application'.

Customer Information pursuant to Art. 16 of the PPWR (EU Regulation 2025/40): To the best of our current knowledge and based on information from our raw material suppliers, the products we supply do not contain the heavy metals listed in Article 5, paragraph 4 of the PPWR (lead, cadmium, mercury, and hexavalent chromium) in a total concentration exceeding 100 mg/kg. Pöppelmann neither intentionally adds these regulated substances as components nor are they expected to be present in impermissible concentrations as impurities resulting from the manufacturing process.

Furthermore, according to information from our suppliers, our products do not contain any substances of very high concern (SVHCs as defined in the current REACH Candidate List) in a concentration exceeding 0.1 percent by mass. Pöppelmann does not intentionally add these substances during the manufacturing process. Any presence below this reportable threshold is attributable to unavoidable, raw material-related impurities or technical specifications set by raw material suppliers, which, for us as a processor, represents the technically unavoidable minimum within the context of quality and raw material properties.

Your added values:

DIN ISO

Better fit.

Protection for the tapred heads of grease nipples in accordance with DIN EN 71412.

Better.

Protect the tapered head of grease nipples against contamination and visibly mark lubrication points. Caps are knurled for ease of grip.

IP4X

Seals better.

Protection against foreign objects>1 mm
