

NEW

Application

The GPN 366 contact protector is used to protect compact plug connections in the low-voltage range and is also suitable for oval openings. The handy grip tab ensures quick removal and the circumferential ribs enable an optimum clamping fit. Within certain limits, the contact protection prevents the ingress of liquids.

All information about 100% PCR and the recycling blend can be found in "Sustainability at Pöppelmann" (see chapter 2) or at www.poeppelmann.com/en/kapsto/Responsibility.html

Dimensions in mm.

Information on materials, colours, designs and use of our products can be found on the website and in chapter 3 'Materials and application'.

The article consists of 98 % PCR-PE and 2 % colour based on a PIR carrier. The plastic used consists of 100 % PCR.

For these articles, colour deviations and black dots cannot be completely avoided in production and are permissible. We recommend carrying out functional tests before series production.

The illustration is exemplary. This is a product from our standard programme. Deviations between the individual sizes are possible.

Your added values:

More resource-saving.

The plastic used consists of 100 % recycled material.

Saves time.

With practical tab for fast removal.

Seals better.

Prevents penetration of liquids within certain limits.

Cleaner.

Production in accordance with VDA Band 19 and ISO 16232 in our cleanroom on request.

Better.

Circumferential ribs for perfect design fit.
