## Application

The LEAVYSEAL GPN 367 contact guard is designed to protect TE LEAVYSEAL connector housings in low-voltage applications featuring lever-operated connector housings. Its side grip tabs allow for quick and easy removal. Thanks to the internal clamping contour, the contact guard seals against splash water from all directions in accordance with protection class IP44. Due to its flat design, the contact guard can also be used in confined spaces. Furthermore, the contact guard can be mounted on either side.

- Quick removal thanks to side grip tabs
- Low profile
- Specific protection solution for LEAVYSEAL connectors from TE Connectivity

All information about 100% PCR and the recycling blend can be found at [www.poeppelmann.com/en/kapsto/Responsibility.html](http://www.poeppelmann.com/en/kapsto/Responsibility.html)

Information on materials, colours, designs and use of our products can be found on the website and in chapter 4 'Materials and application'.

**Customer Information pursuant to Art. 16 of the PPWR (EU Regulation 2025/40):** To the best of our current knowledge and based on information from our raw material suppliers, the products we supply do not contain the heavy metals listed in Article 5, paragraph 4 of the PPWR (lead, cadmium, mercury, and hexavalent chromium) in a total concentration exceeding 100 mg/kg. Pöppelmann neither intentionally adds these regulated substances as components nor are they expected to be present in impermissible concentrations as impurities resulting from the manufacturing process.

Furthermore, according to information from our suppliers, our products do not contain any substances of very high concern (SVHCs as defined in the current REACH Candidate List) in a concentration exceeding 0.1 percent by mass. Pöppelmann does not intentionally add these substances during the manufacturing process. Any presence below this reportable threshold is attributable to unavoidable, raw material-related impurities or technical specifications set by raw material suppliers, which, for us as a processor, represents the technically unavoidable minimum within the context of quality and raw material properties.

## Application Overview

## GPN 367

Our product advantages at a glance:

**More resource-saving.**

The plastic used consists of 100 % recycled material.

**Seals better.**

Protection against splashing water from any direction (IP44) depending on the specific connector design and quality.
