Application

The HV protection GPN 385 Type C is suitable for use in parts and components for hybrid or electric vehicles. They protect connectors in the area of batteries, DC/DC converters, on-board chargers, power strips or high-voltage distribution, against corrosion, mechanical damage and offer protection against splash water in accordance with protection class IP44. The cap has non-slip gripping surfaces that enable quick removal, can be fitted on both sides and impresses with its functional design as a registered design. The plastic used is made from post-consumer recycled material.

All information about 100% PCR and the recycling blend can be found at www.poeppelmann.com/en/kapsto/Responsibility.html

Information on materials, colours, designs and use of our products can be found on the website and in chapter 4 'Materials and application'.

Customer Information pursuant to Art. 16 of the PPWR (EU Regulation 2025/40): To the best of our current knowledge and based on information from our raw material suppliers, the products we supply do not contain the heavy metals listed in Article 5, paragraph 4 of the PPWR (lead, cadmium, mercury, and hexavalent chromium) in a total concentration exceeding 100 mg/kg. Pöppelmann neither intentionally adds these regulated substances as components nor are they expected to be present in impermissible concentrations as impurities resulting from the manufacturing process.

Furthermore, according to information from our suppliers, our products do not contain any substances of very high concern (SVHCs as defined in the current REACH Candidate List) in a concentration exceeding 0.1 percent by mass. Pöppelmann does not intentionally add these substances during the manufacturing process. Any presence below this reportable threshold is attributable to unavoidable, raw material-related impurities or technical specifications set by raw material suppliers, which, for us as a processor, represents the technically unavoidable minimum within the context of quality and raw material properties.

Application Overview

Article	Article number	Manufacturer	Connector family	Housing Type	Number of poles
GPN 385 HV 50 WL	38505030000	Rosenberger	HVR	male	2

Our product advantages at a glance:

**More resource-saving.**

The plastic used consists of 100 % recycled material.

**Saves time.**

Quick disassembly thanks to non-slip grip surfaces.

**Seals better.**

Protection against splashing water from any direction (IP44) depending on the specific connector design and quality.
